Analysis & Technical Support

RRD Exhibition for Research Materials

Research Resources Division,
RIKEN Center for Brain Science

In order for researchers to make informed decisions about the purchase of newly developed research equipment and materials, we have been introducing a forum for exhibiting products on a fair and equal basis. The exhibitions will be based on the following guidelines.

Note
1. Exhibitors: The exhibitions will be given by manufacturers directly, with not intermediaries.
2. Selection of products to be exhibited: Research Resources Division (RRD) will consult with specialists (researchers) to determine the suitability of specific equipment and materials.
3. Who may attend: All personnel from Center for Brain Science (CBS) and the RIKEN Wako campus community.
4. Requests for exhibition: Manufacturers requesting to make an exhibition should apply to the RRD contact listed below (by email).
5. Format of exhibitions: Manufacturers and their technicians will introduce the specifications and operating instructions. Essentially, explanations will be available in both Japanese and English. A seminar format may be used in some instances. These will be kept to a minimum time limit (less than 30 min.).
6. Demonstrations: Demonstrations may also be included, depending on the nature of the equipment or materials.
7. Place: Room S307, 3F, CBS Central Building
8. Costs: The manufacturer will bear all costs for the exhibition including transport, set up, maintenance, removal of equipment or materials, and consumable items.
